DISPLAY MONITORS, KEYBOARD AND COMPUTER OPTIONS

Keyboard options

Keyboards can be small Bluetooth, medium Bluetooth or medium USB or large USB. USB keyboards come with cable clips and special 90° elbow to minimise cable display.

You can have a USB keyboard and a Bluetooth keyboard both working with the same laptop or Surface Pro.
The choice is yours - small, medium or large keyboard top and bottom, or just one, or none at all!

SpeedPix compatible computers

All of our stands accommodate Surface Pro®s (12.3 inch screen). All Surface Pro mounting plates have special slots that accept an optional small medium or large keyboard tray at either the front or the back.

Surface Go® (10 inch, almost identical to an iPad® size) mounts can accept a keyboard tray at the back or the front.

Although all our stands will hold an iPad SpeedPix does not currently work on iPads.

Stands can be fitted with a stainless steel cable – as an option to reduce theft when unattended. Clamp on stands have higher thief resistance.

All stands can accommodate a conventional laptop instead of a Surface Pro. We strongly suggest using a dedicated laptop or Surface Pro for the use with SpeedPix so it is always on and always instantly available at the push of one button.

Bluetooth vs. USB

A Bluetooth keyboard is ideal when walking around your exhibition stand and engaging customers using large screen TVs on the back wall.

You can have multiple Bluetooth keyboards driving the same computer and screen.

The small Bluetooth keyboard has an inbuilt track pad and is small enough to keep in your coat pocket.

1. Decide which computer you will use - works with any laptop - PC or Mac

We recommend a Surface Pro or Surface Go dedicated to SpeedPix as it can be used without the native keyboard - either as a tablet or with our special mini keyboard options.

Microsoft®Surface Go
10 inch

Microsoft® Surface Pro
12.3 inch

2. Choose keyboard position - bottom and/or top mounted

All keyboards come with suitable size mounting tray to affix to stands.

3. Choose optional keyboard size for top and/or bottom position

A keyboard is not necessary when using a touch screen such as a Surface Pro or Surface Go.

## SPEEDPIX SOFTWARE AND HARDWARE - CLAMP ON

This secure design takes up minimal desk space and offers flexible screen position options.

The stand height is adjustable, and the monitor can be tilted and swiveled to a comfortable viewing position.

This model is the most theft resistant in the range.

Importantly there are no sharp edges underneath to catch clothing or irritate like other systems.

SPEEDPIX SOFTWARE AND HARDWARE - PEDESTAL

Ideal for trade shows. It can be easily moved then weighted down by an optional water filled ring which can be concealed with the optional black fabric skirt.

Best of all - it takes up no bench space and easily comes apart for transportation! Fits into standard domestic luggage.
